Thanks for the quick clarification, Shannon. I will use the corrected version for our analyses.

Kai Qin

Yep, we copied that column in separately (b/c it wasn't in your original spreadsheet) and it ended up one row off. I've attached a corrected version.

On other rows, such as P566, there was no valid data but there was no comment on whether there were any video errors. I am wondering if P565's comments about video errors was meant for P566.

Hi Adam,

I'm attaching the data from our lab. Sorry it's taken us so long to get it to you -- coding has taken much longer than we expected. In retrospect, we should have stopped collecting data earlier.

I couldn't get the summary pages to calculate -- but I figure you're better poised to fix those than me.

Also, I apologize for missing your recent emails. They were going to spam for some reason. Hopefully the data are still in enough time to be useful.

Warmly,
Shannon
