Adam,

Here are our datasets. Please let me know if there is anything I need to submit.

Thanks for the update Chris! There is no website to upload the results, you can just email the datasets to me via email

I look forward to it!

Adam

Adam,

Sorry for the delay in my response. I believe we have finished codeing and resolving differences in those codes. I am hoping to upload the data sets to wherever they need to go (I will have to look back through the documentation to find where that is) this week.

Again, sorry for the delay.

Importance: High

Hi Chris

Just following up with this email in case you missed it

Looking forward to hearing from you!

Cheers
Adam

Hi Chris

Hope all is well! Its early September so I am just emailing the remaining labs for an update on when we should expect to receive the final datasets

Best regards
Adam

Hi Chris

Yes that is fine, as long as their final decisions are in agreement with one another.

All the best!
Adam

Adam,

And, just to confirm, it is fine if their final decision does not match either of their original codings?

Thanks for the update Chris!

Yes for study 2, initial inter-coder discrepancies are very normal. We ask that you keep each coder's initial input (as per the dedicated excel columns) as they are. Next, we suggest that the coders get together in a meeting to figure out where the discrepancies are coming from, and ultimately come

to an agreement for each discrepancy (again, as per the dedicated excel column). If the coders have irreconcilable differences, this is where the lab leader can step in and make the final decision.

Hopefully this clarifies, let me know if you have any other questions!

Cheers
Adam

Adam,

We have finished coding for Study 2, and one of my RA has finished Study 1. I am waiting on the final RA to complete Study 1 coding."

There was a lot of disagreement between A, B, and C for Study 2 between the coders (for period 1 and 2). How do you recommend resolving inter-coder discrepancies?
