Updated SPEAR Lab RRR Study 1 Results Spreadsheet.xlsx; SPEAR Lab RRR STUDY 2 results input spreadsheet.xlsx;

Hi Kaiqin

Here are the updated datasets from Madison

Cheers
Adam

Hi Adam,

I have attached the spreadsheets with our final results (probe data included) for both study 1 and study 2.

Best,
Madison

Hi Adam,

Thanks for your response. Is that supposed to refer to the question on the handout asking if the participant believes that they know the study's aim?

On Thu, Jun 6, 2024 at 12:47 AM Adam Wang <adam.wang@jcu.edu.au> wrote:

Hi Madison

The probe columns just require each experimenter to indicate whether each participant had passed or failed the suspicion probe. The "probe final" column is the final agreed upon decision of the two experimenters regardless of whether there were initial discrepancies. Please see the top left corner of the excel file for relevant notes/legends

Let us know if you have further questions, thanks
Adam

Dear Madison,

I am the analyst on this RRR project. For study 1 that you sent to Adam, three of the probe variables in datafile do not have any data:
**probe.coder1 probe.coder2 probe.final**

Could you enter data for these and resend?

Regards,
Kai Qin

Hi Kaiqin

This is the Study 1 data only (they also need to re-do their S2 data) from one of the labs.

Cheers
Adam

Hi Adam,

I have attached the spreadsheet with our lab's data for study 1.

We are working to wrap up the data for study 2 as re-coding has taken a bit more time than anticipated. I will send the sheet with that data in the next day or two!

Best,
Madison

Thanks for the update Madison!

The deadline is currently still end of May so 31st of May

Looking forward to it!

Cheers
Adam

Hi Adam,

We wanted to send an update to let you know that we've completed data collection with 86 participants for study 1 and 80 participants for study 2.

We're currently working to finish inter rater coding for both studies and the coding corrections for study 2.

Is there a deadline for when you would like the data to be sent?

Thanks!
Madison
